The committee for helping the new look and the old redefined in the Spanish War. These folks ought to come home, where they can get three square meals a day with fresh bread at each meal, and have a featherbed to sleep in at night. They are not the kind of men to make soldiers of.

It makes the average old soldier of 1861-3 tired to hear the bony shes that go out through the year, especially the ones performed in the Spanish War. These folks ought to come home, where they can get three square meals a day with fresh bread at each meal, and have a featherbed to sleep in at night. They are not the kind of men to make soldiers of.

A CRITICAL TIME.

During the Battle of Santiago—Sick or Well, a Rash Night and Day.

The Officers at the Battle of Santiago de Cuba Were All Heroes—Their Heroic Efforts in Getting Ammunition and Rations to the Front Saved the Day.

F. R. Butler, of pack-train No. 8, writing from Santiago de Cuba, on Aug. 28, says: "We all had diarrhoea in more or less violent form, and when we landed we had no time to lay in supplies, so we had to go to the front at night and keep to the troops supplied with ammunition and rations, but thanks to Chamberlain's Colle, Cholera and Diarrhoea Remedy, and the heroic efforts of the men in the Army for their health; in fact, I sincerely believe that at one critical time this medicine was the indirect saviour of our army, for if the packers had been unable to get to the front at night, we had no way of getting supplies to the front. There were no roads that a wagon train could use. My comrade and myself had the good fortune to lay in a quantity of the medicine for our men before we left the front, and I know in four cases it absolutely saved life."

The above letter was written to the manufacturers of this medicine, the Chamberlain Medicines Co., Des Moines, Iowa. For sale by J. Jan Wood & Son, Druggists.

THE BUYERS' GUIDE.

A Big Wheat Crop For 1899.

That's our prediction for Mason, Bracken and Robertson counties. We make no pretensions in the way of fortune telling; neither are we a prophet. We are simply gifted with a goodly amount of "horseshoe sense." We know that there will be a good wheat crop next year, because the bulk of the wheat grown this fall will be harvested in April and May, and they make no mistake. Empire Drills are positive and positive. They do, and they make no mistake. The Empire Disc Drill is the only positive feed drill made. It will till the same quantity of wheat, rye, oats or barley with the same gear. Size of the grain cuts no figure with the Empire. You do not have to sow four or five acres before you know what you are doing as with other drills. The Empire has telecoping steel conductors which never break or choke up as do the old-fashioned rubber conductors. The Empire drag bars are fastened to the top of the tool, five inches higher than on other drills and trash will not choke and stop the Empire.
